

Distressed Financing

Although we do not hold ourselves out as a “bankruptcy” law firm, Nelson Hardiman lawyers have served as turnaround agents who have advised on some of most complex restructurings and distressed financing transactions in healthcare in recent years. Nelson Hardiman attorneys are proud to have served behind the scenes in some of the most dramatic hospital turnaround stories of the decade. Our team of healthcare attorneys have extensive experience with the full range of options to relieve financial distress, including corporate reorganizations, debt restructurings, bridge loans, asset-based lending, and other distressed financing options. We offer our clients an insider’s perspective on distressed financing strategies and solutions that create and preserve value. Nelson Hardiman also works with bankruptcy counsel to address regulatory issues in bankruptcy and other distress settings.
