

Nelson Hardiman Instrumental in \$60 Million Pharmacy Acquisition

Nelson Hardiman performed the regulatory due diligence, licensing and enrollment work for a pharmacy acquisition involving six brick and mortar pharmacies licensed in 50 states. The pharmacies were acquired for approximately \$60 million and required the preparation and submission of more than 100 state licensing, Medicaid, Medicare, DEA and NCPDP applications. The large acquisition required the development and management of a complex timing status and strategy based on differing rules and regulations in each state to achieve a smooth close that did not negatively impact the pharmacies' operations or reimbursement flows.
