

Digital Health Startups: From Ideas to Successful Exits

Managing partner, Harry Nelson, will be joined by Intellectual Property attorney Kevin Debre at the Los Angeles Venture Association Healthcare event to discuss the logistics of creating a healthcare technology company.

About the event:

Investments in digital health start-ups have been setting record highs since 2010. More than \$23 billion flowed into digital health startups since 2010. 2017 saw the greatest amount of funding being poured into digital health to date with a steady increase in completed deals. For instance, in the first half of 2017, \$3.5 billion was invested in 188 digital health companies – setting a record for the number of companies funded and the total amount invested.

Our distinguished panel will discuss (1) distinctive topics in building digital health ideas towards successful exit, (2) challenges and opportunities in the current investment environment, and (3) what it will take for founders and entrepreneurs to establish their start-ups as an attractive investment.

Please join us on July 12th for an informative, interactive session and networking.
