

Nelson Hardiman Successfully Defends Orthopedic Surgeon

Nelson Hardiman successfully defended an investigation into workers compensation billing practices. Nelson Hardiman's client, an orthopedic surgeon, was audited for various surgical billing practices, including reimbursement for pre-operative use of fluoroscopy, with concerns of significant overpayment. Nelson Hardiman conducted a thorough investigation to address the insurer's concerns. After review, the investigator concluded that the firm's presentation had addressed all of the audit concerns, resulting in a closure of the audit without any demand for repayment.
